

Aqua Vane Tank Level Indicator – Installation Instructions

Components: 1 x black float; 1 x orange float; 1 x stainless support bracket; 4 x 20/8 s/s screws; 1 x s/s roll pin; 2 x s/s rods.

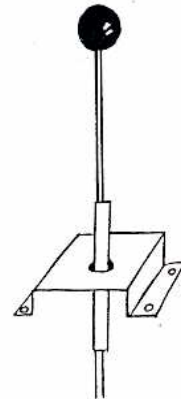

1. Drill a 20 mm hole in the horizontal part of the manhole riser as shown.

2. Fit the support bracket tube into the 20mm hole and secure the bracket in place with the 4 s/s screws.

3. Screw a float on to the threaded end of each stainless rod and, from the inside of the tank, feed the rod with the black float through the s/s bracket which is screwed on the tank.

4. Screw the two rods together and insert the roll pin through the hole on the rods.
